Antelope Valley - The Antelope Valley Air Quality Management District has issued a Smoke Advisory today for Antelope Valley. This advisory will remain in effect until further notice. Windblown smoke from several wildfires burning outside the Antelope Valley are causing smoke impacts in the Antelope Valley area. Shifting winds throughout the day may cause varying smoke impacts within the Antelope Valley.

All individuals are urged to exercise caution and avoid unnecessary outdoor activities in any area directly impacted by smoke. **Smoke impacted areas are where residents can see or smell smoke.**

**In smoke impacted areas: Everyone should avoid any vigorous outdoor exertion; people with respiratory or heart disease, the elderly, and children should remain indoors. Run your air conditioner, if you have one, to provide some filtration to the outside air.**

Wildfires generate smoke containing numerous air pollutants including fine particulates known as PM10 and PM2.5.
